Management Club Enjoys Talk by Mountain Climber

The adventures of a nationally known mountain climber thrilled and chilled the members of the Sprague Electric Management Club at the May meeting held at the Clarksburg Sportsmen's Club. Richard S. Hirschland, guest speaker, illustrated his talk on mountain climbing with films. Mountain climbing is a subject on which Dick Hirschland is familiar as he and his wife, Bonnie, have conquered lofty summits in Italy, Austria, and Switzerland, as well as in the U.S.A. However, as President of the George V. Clark Company, Mr. Hirschland has to limit his mountain climbing to week ends and vacation trips.

Mr. Hirschland was introduced by Kenny Russell, Program Chairman of the Club.

Following the very enjoyable talk was a business meeting at which George Senecal and Ralph Boisjolie were elected to serve as delegates to the 29th

Sales Representatives and Engineers Boost Sales Figures

Sprague Electric has 17 commissioned representatives, 9 sales engineers working out of North Adams, and 4 district sales representative offices, in New York, Washington, D. C., Dayton, Ohio, and Culver City, California, selling capacitors and other electronic units.

Like other young organizations, when Sprague Electric was getting its start, it had manufacturing representatives to sell its products. These manufacturing representatives provided a very effective way for a growing company to get distribution. These manufacturing representatives were commission agents with an assigned territory. Harry Kalker started with Sprague Electric as the manufacturing representative for the New York area. Samuel Darmstadter was, and still is, the manufacturing representative for the Chicago area.

As our Company matures and our volume of production and sales increase, it has become necessary and desirable to develop and train an effective sales engineering force. These men are trained specialists and supplement and augment

the work of our representatives and salesmen. The Sprague Electric line is becoming so complex that it is almost impossible for a sales representative to know the whole line. Sprague Electric now manufactures to about 22,000 different specifications in the course of a year. There are 140 new specifications each week, making about 7000 new specifications a year. No one in the whole organization is familiar with the whole line. Hence, the line must be divided.

Leon Podolsky, Chief Field Engineer, heads up a group working on special projects. Mr. Podolsky is outstanding on Resistors. Philip Bell assists Mr. Podolsky. Power Factor Correction Capacitors, which improve the efficiency of motors, are handled by Jesse Allison, who is assisted by 37 men. Leo Dornbos specializes in Filters.

Carroll Killen is responsible for all military agency contacts. James Galbraith, Louis Shuey, and Robert Peters work directly with assigned customers, follow new developments, and have been very successful in developing a close and harmonious working relationship between Sprague and the customers they are contacting.

Harry Kalker is President of Sprague Products, a wholly-owned subsidiary of Sprague Electric, which sells to jobbers. William Adams is in charge of Export Sales.

The New York Sales Office, under the direction of Nicholas Gal, services our customers in the New York area. Mr. Gal is assisted by John J. Tucker, Herbert F. Geiling, and F. W. Reynolds, Jr.

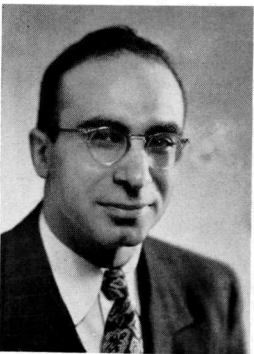

The California Office is headed by Thomas S. Bills, and includes John J. Fiske, Dana Grindy, George S. Karotis, Paul M. Kuefler, Fred J. Nichols, John H. Harley, and Victor Kingsolver.

John Sheridan aided by James Long takes care of the Washington Office. William Lana is in charge of the Dayton Office.

Who Buys Sprague Electric Products

Between 1600 and 2000 different customers purchase the products manufactured by Sprague Electric. About 1000 of these customers are domestic manufacturing concerns. About 1000 of them are jobbing and export customers.

During January of 1952, the biggest customer purchased less than 6% of the

products manufactured by Sprague Electric during that month. This is a healthy distribution. One customer is not depended upon to do the bulk of the buying.

A list of a few Sprague Electric customers contains many familiar and famous company names. Did you

Sales and Application Engineers Contribute to Creation of New Sprague Electric Lines

The function of Sales and Application Engineering is to develop new products and to find new applications for old products through contacts with the engineering departments of customers. When the Sales and Application Engineers find a need for a new product or the need for a new application of an old product, they make note of the engineering requirements for the change or for the new product. These engineering requirements then are given to the Research and Engineering Department which determines if the requirements can be met. If they can be met, the units are designed.

Sales and Application Engineers contribute to the creation of new lines. The Miniature Metal Clad line was born through Sales and Application Engineering contacts. Contacts by Sales personnel divulged that there was a military need for a tiny unit with a new type of seal for use in fuses and a great variety of other military end equipment. Julian Sprague spark plugged the mechanical design of a complete line. The engineering requirements were turned over to the Research and Engineering Department.

Arrangements were made with suppliers for seals and cans. And Sprague Electric was first in the field with Miniature Metal Clad Capacitors. These miniature units have become the military standard for most new military equipment and have made possible a substantial part of the miniaturization which has taken place. They today represent the largest dollar volume sales of any Sprague product.

The establishment of the Molded Prokar line is a similar story. It was the result of Sales and Application Engineering contacts.

The Sales and Application Engineers spearhead the pioneering of Sprague Electric electronic development.

All the rain in the world didn't keep **Charlie Lincoln** from going fishing. Although it kept most of our best fishermen home, Charlie proved himself a great fisherman by bringing home five fish which he claims he caught in 20 minutes. He isn't telling where he caught them. This is not a fish story, boys.

Industrial Oils Honors
Jack Shields at Dinner

The Industrial Oils honored Jack Shields at a dinner at Petey Dinks on May 12.

Lou Vincelette, as master of ceremonies, was, as usual, very good. Ken Russell, who is to take Jack's place as Foreman of Industrial Oils, was guest of honor. Kenny, John Muldowney, and Stanley Bagdon were the speakers. They told us a few things "we thought we knew and didn't and a few we thought we didn't know and did". But one thing we got straight was when the change was to be. Ken and Jack expect to take up their new duties June 1.

We are sorry to lose Jack as our Foreman, but very glad to see him take another step up the ladder. We wish him the very best of luck and we are all behind him 100%.

We welcome Kenny Russell and hope he will like working with us.

Dancing was enjoyed and a good time was had by all.

Drury Defeats Pittsfield in Dual Track Meet at Noel Field - - 63-36

Drury's formidable track team scored a decisive victory over Pittsfield High in their dual meet at Noel Field, May 22, the final score being 63, 36.

Coach Dom Guizzo's athletes were far superior, posting one of the few victories in recent years over their Shire City foe. The local school registered seven first places in the 11 events. It was particularly strong in the running events taking first place in each.

The performance of **Charlie Perenick** and **Danny Hawthorne** in the high jump was one of the features of the meet. They tied for first, clearing the bar at five feet, eight inches, which is a new Drury record.

The local school's next meet will be with West Springfield High next Monday and then comes the annual Western Massachusetts championship event.

Sports Highlights

In a letter sent to the Sporting News, **Ty Cobb**, old-time Det old Tiger great, denies he intended to blast **Ted Williams** or **Joe DiMaggio** in his recent article which appeared in Life magazine. He explains that he was only trying to help baseball.

From **Searles High** of Great Barrington comes the suggestion that the Berkshire schools form a golf league at this end of the county. Williamstown might be interested in such a project.

John Kulsar, a strong back at **Williams College**, both offensively and defensively for three seasons, should make quite a bid to stay with the **New York Giant** in the pro grid league the coming season. Kulsar, whose home is in Buffalo, is 22 years old and is to study for the ministry. He will graduate from **Williams** in a few weeks.

Mrs. Mildred "Babe" Zaharias is seriously ill and may miss competing in a transcontinental golf tournament.

Actually, the two sports highlights of the month took place far from this area. Out in Detroit on May 15, **Virgil "Fire" Trucks** threw the first no-hitter of the season beating **Washington** in a dramatic game, 1-0. Still farther west, on the Coast, Mexican **Lauro Salas**, a 4-1 underdog, upset **Jimmy Carter** to take the world's lightweight crown on a split decision.

Drury's track team opened its season with a 78-26 victory over the **Deerfield Academy** jayvees. The local team took first place in every event except the javelin, mile, and relay.

Williams Nine Victor In Tilt With Amherst

Williams rallied in the late stanza to pin a defeat on the **Amherst** nine in their Little Three meeting at Amherst, the score being 8-3. It was the Ephemer's second start in the series and their first victory in the defense of their title topped a year ago. They lost to **Wesleyan** on **Weston** field a week ago.

Amherst led the **Purple**, 3-0, after six innings had been completed but **Coach Bobby Coombs's** tossers then pulled themselves together and registered a decisive victory. They went ahead with four runs in the seventh, tallied three more in the eighth and added another run in the ninth for good measure.

Sport Oddities

Did you know that only one professional boxer ever fought after he was fifty years old? **Jack Johnson**, former heavyweight champion, fought several exhibition bouts after that age.

In one respect, the greatest base-stealer of all time was not the immortal **Ty Cobb**, who still is the greatest player the world has ever known. **Max Carey** of the **Pittsburgh Pirates** in the year 1922 stole 51 bases out of 53 attempts for a percentage of 96. **Cobb's** greatest year, 1915, saw him file 96 out of 134 attempts for a mark of 71%.

Northern Berkshire School Baseball League Nears End

The Northern Berkshire School Baseball League reaches its home stretch when the schedule winds up with games slated for May 29 and 31. **Pittsfield** has a comfortable lead at the top of the standings and indications point strongly to the dethroning of **Dalton High**, the defending champions, by **Coach Art Fox's** Club. The **Paper Town** remains in the pennant race, however, and much will depend upon its return meeting with **Pittsfield**.

St. Joseph of **Pittsfield** has proved itself the dark horse in the competition thus far. **Drury**, **Adams**, and **Williamstown**, the three schools located at this end of the county, were all eliminated early in the season.

"Every Sprague Employee an Assistant Reporter"

Published every two weeks by SPRAGUE ELECTRIC CO., North Adams, Mass.

Feel a Little Sorry for Joe . . .

Joe Doakes has to report to work at 7:00 a.m. at the Marshall Street plant. At approximately 5 minutes to 7, he drives into the Marshall Street parking area and starts looking for a space. There are no places, or rather, there were plenty of spaces but because Joe's fellow workers have taken more room than they actually needed and did not park in the proper manner, there were no places left. Finally, Joe spots a little tiny place way down the lot. He parks there and rushes into work to find he is late because of the time wasted in the parking lot.

At lunch time, Joe comes out to get his car and drive home for his mid-day meal. When he gets to his car, he finds it has been sandwiched in so neatly that it is impossible to move. Joe is plenty burned up. And what makes him even more angry is that the cars hemming him in don't have Sprague Electric parking stickers on the back window so he assumes they belong to people who have no right to park in the lot in the first place.

You feel kind of sorry for Joe, don't you? What happened to him probably happened to you more than once. If each of us observes a few rules, this sort of thing will not occur. They are:

1. Park in the proper manner, not using any more room than you absolutely need.
2. Do not hem in other cars.
3. Place your parking sticker on the back window of your car to show you are entitled to use the parking area.

In addition to the Marshall Street parking lot, the Houghton Street parking area has been opened and anyone may use it.

Vacationing in Safeland . . .

New York, Hampton Beach, Boston, Cape Cod, fishing trips to Canada, a tour of the West—these are only a few places where Sprague Electric people go on their vacations. And some like a quiet vacation at home, gardening, painting the house, or just plain relaxing.

Whether you stay at home or go away, everyone enjoys a vacation. Or rather, almost everyone enjoys a vacation. You enjoy a vacation if one of your children isn't drowned at Hampton Beach; you enjoy a vacation if your car isn't wrecked and your family put in the hospital because you were speeding home from a Red Sox game in Boston. You enjoy a vacation if you don't get a first degree sunburn on the white beaches of the Cape and land in bed for three or four days; you enjoy a vacation if you don't pick up a bad case of poison ivy while viewing the grandeur of the White Mountains and then lose several working days convalescing.

Vacation time is often tragedy time. You've read about the drownings and auto accidents. And, impossible as it may seem, it could happen to you. You can prevent accidents by just using common sense. Then your vacation land will be Safeland.

Cub Scouts Hold First of Annual Soap-Box Derbies

Cub Scouts line up with their vehicles to parade to the racing grounds.

Several weeks ago, Stetson Road in Williamstown was the scene of the first annual Cub Scout soap-box derby. This unique race attracted eighteen entries. The young hot-rods drove racing cars built by Cub Scouts, aided by the mechanically-minded fathers.

Sprague Electric fathers took an active role in the activities at the speedway. Cubmaster Robert Sheehan and Arthur Ceely were timers, and Hugh Kirkpatrick was signalman.

Hugh Kirkpatrick's son, Shawn, took first place in the final run-off with the time of 19 seconds. Second place was taken by Paul Orell with 22 seconds, and third place went to Willard Moody who ran the course in 23 seconds.
